

## **ERC fundraising network Scandinavia**

A new fundraising network within ERC is currently being formed. The network will focus on mobilizing economic resources for the core activities, initiatives and projects of Ecosystem Restoration Camps – by targeting Scandinavian donors and sponsors. At this moment the network is centered in Sweden but very much open to include the other Nordic countries. The network will especially apply for funding from various private foundations, national agencies (i.e. Swedish International Development Agency), corporate sponsorship, as well as involving new members and founding friends.

We are looking for new network members! Relevant language skills, experience of grant writing and knowledge of local/national donor context is very valuable, but not a must. Many applications can be written in English. However, as the work is text-based to a large degree, experience with writing is recommended. Additionally, we welcome skills and competences related to the thematic areas and methodologies of ERC, design, social media and marketing. At this initial stage the network will have a fairly small size, in order to avoid too much coordination.

If you are interested in joining please send network facilitator Gustaf an email at [jordstam@protonmail.com](mailto:jordstam@protonmail.com) and tell us more about yourselves!
