

## **Research Officers x10 Multiple Locations**

**Deadline, November 6th, 2020**

We are looking for 10 Research Officers who can visit camps around the world to collect data according to [our framework](#). These are positions that are particularly relevant to existing students who are looking for an opportunity to use their thesis to have real life impact.

The job involves:

- Travelling to an ecosystem restoration camp
- Collecting data according to [our framework](#)
- Sending the data to the foundation

We can provide you with a training session on how to collect this data. [The framework](#) has been designed to be used by anyone, therefore you do not need to be in academia to take on this role.

The length of time that you spend at the camp is dependent on the agreement you'll create with the camp themselves. We will decide together on which camp you will work with depending on your preference, location, and the camps that are looking for Research Officers at the time that you apply.

Please apply by sending in a short video/written text about why you are right for this role to [ashleigh@ecosystemrestorationcamps.org](mailto:ashleigh@ecosystemrestorationcamps.org)
